IPinSTEAM Kicks off!

2021 saw the beginning of the IPinSTEAM project, funded by ERASMUS+. The project, made up of a consortium of six partners, had been intended to start with a meeting at the offices of the coordinating partner – CIVIC – in Edinburgh, but due to the pandemic, partners instead met online over Zoom.

The meeting itself was very productive, with all partners getting the chance to meet each other, explore and discuss their individual roles, and elaborate on the objectives and activities of the project.

Since this meeting, the project has

progressed as planned, with the consortium by now having completed the important rationalisation phase and getting a good start on the second activity: the lexicon and tool bank.

All of these deliverables will be made available on the project website through as the project itself progresses, **so be sure to visit and follow us on social media** too, where updates will also be posted!

In the meantime, watch this space and help us improve STEAM subjects through IP!

Project Objectives

The IPinSTEAM project has a goal of improving awareness and teaching of intellectual property issues in education to empower STEAM subjects in particular

It aims to achieve this through several activities over the course of two years:

1. Developing a course to improve teaching of IP issues in STEAM subjects.
2. Creating a gamified moderator to deliver content in an accessible and engaging way.
3. Creating a virtual League where teachers and others can share knowledge and best practices.

IPinSTEAM website

Meet the Partners

CIVIC Computing (UK) – an
Edinburgh-based digital
agency and project coordinator

**ELLINOGERMANIKI
AGOGI**

Ellinogermaniki Agogi (EL) – an
educational organisation based
outside of Athens, including pre-
school, primary, and secondary
